

Integrated Pest Management

Integrated Pest Management (IPM) is a common-sense approach to managing pests while reducing the use of harmful pesticides. IPM programs focus on preventing pest problems by getting rid of the food, water and shelter that pests need to survive. When pest management is needed, IPM uses a combination of common-sense, least harmful practices.

Prevention is The Key

Keep a clean home in good repair to prevent pests from moving in.

Inspect Often

Frequently inspect your home. Early action can stop damage and save you money.

Remove Pest Needs

Remove access points, clutter, free food, and water to keep pests from moving in.

Keep Pests Out

Weatherproof and repair openings around your home to close pest access points.

Try Mechanical Methods First

Look into traps and devices used for your specific pest.

If a Pesticide is Needed, Read the Label First!

All pesticides must be used according to the label. It is the law.

Get in Touch With Professional & Licensed Pest Control Experts

Maximum Pest Control Services understands the importance of offering affordable and rapid pest control solutions that actually work. For proven to work IPM treatments, simply contact us.

We service Greater Toronto Area including Oakville, Burlington, Mississauga, Milton, Scarborough, Hamilton and other nearby neighborhoods in Ontario Canada.
